Sheet cast steel from the best makers is by no means an inferior article for such cutters, if carefully worked and not overheated in tempering. What will answer for a saw will not do for cutters that have sharp edges, not that a saw is not better if made from fine steel, but the edges are more obtuse and not so liable to break. These thin knives were patented first by Godeau in France, subsequently by Gedge in England, and perhaps several times in America, so the plan is well patented, if that Js to be regarded as a recommendation. In sharpening these cutters, fine mill saw files of good quality can be used....
