Brand New Book ***** Print on Demand *****.Excerpt from A Treatise on the Science and Practice of Midwifery During the intervening four years since the last American edition was issued, very decided advances have been made in the field of obstetric surgery, particularly in the adoption of methods that have resulted in the saving of human life. The conservative Caesarean operation in the most carefully managed European maternities, and even in the general practice in our own country, may be honestly claimed to save 90 per cent. of the women - 16 having died out of 160 cases in certain European hospitals, and 2 out of the last 20 in the United States. The Porro-Caesarean record of all countries now shows a mortality which has been reduced to 14 per cent., as proven by the record of 1890-1891; and the sub-peritoneal, replacing the fatal intra-peritoneal method, has saved 22 women out of 25. The introduction of symphyseotomy into our country a year ago, has required us to give a special notice to this operation, now so largely performed in Europe, and attracting a growing attention here, because of its possibilities of success. The term laparotomy, and the prefix laparo-, as applied to abdominal surgery, and not to flank-incisions, have been abandoned throughout the volume, and the term c diotomy, and the prefix c lio-, substituted for them. Craniotomy having fallen in the estimation of American obstetricians, and some of the younger thinkers of Great Britain, because of the diminishing dangers of Caesarean and symphyseotomic deliveries, the American editor has striven to do away with the leaning of the English author toward a preference for the infantile destructive method, begotten of opinions based upon comparative...
