

Contributions Volume 1 (Paperback)

By University Of Pediatrics

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 edition. Excerpt: .that the anodal opening contraction does not occur in the normal infant with less than five milliamperes. In spasmophilia a contraction can be brought about by application of the Stinging normal electrode over the median or peroneal nerves with less than five milliamperes upon the Read before the Siom Valley Medical Association, July 24th, 1912. anodal opening. The reactions upon anodal closing, and cathodal closing and opening are also frequently obtained with less current than in the normal child, that is with less than two for cathodal closing, three for anodal closing, and five for cathodal opening. The study of these reactions has been of great clinical value as it has shown us that true laryngospasm, tetany in children, most of the convulsions of children, and spastic apnoea are but manifestations of the underlying condition, spasmophilia. We are not only given a method of diagnosis...
