Army Research Institute for the Behavioral and Social Sciences, 2006 OCLC Number: (OCoLC)318813913 Subject: Soldiers -- Training of -- United States. Excerpt: . . . Length of time required to execute the training events (e. g. , 1 hour). The training event time must include the approximate duration of time required for both the AAR and associated movement time (e. g. , 30 min). Time set aside for retraining. The developer will subtract time set aside for retraining from total available training time. The developer will divide the event plus AAR time (ex: 2 hours) into the remaining available training time (ex: 12 hours), providing an estimate of how many training events can be conducted in the available time (12 hours divided by 2 hours equals 6 training events). Multiply the average number of tasks in a given training event with the number of training events to get an estimate of how many tasks should be in the TSP. Consider that a number of supporting tasks, such as support by fire, may be in multiple training events. Consider command and control training requirements when identifying potential TSPs. Tasks executed at company, battery, troop, and below may cause significant additions to staff planning and preparation, creating a need for one or more TSPs at the staff level. Conversely, company, battery, troop, or below TSPs may require a component section of that units TSP to integrate a higher headquarters multi-echelon training requirement into the same TSP. Continued mission analysis will refine the initial TSP requirements and associated tasks. As discussed, the following questions are designed to cause...
