After the microscopic protozoan is injected into the blood of a susceptible animal it attacks the red Note. --This bulletin is a revision of and su. rsesdes Farmers Bulletin 258. throughout the South. 23613--Bull. 569--14 1 It is of interest lo farmers blood cells, causing them to break down. The disease is characterized by high fever, by destruction of red corpuscles, and the consequent excretion of the coloring matter of the blood by the kidneys, causing a reddish discoloration of the urine, by enlarged spleen, engorged liver, thick, flaky bile, more or less jaundice, emaciation, and death in from 10 per cent of the chronic to 90 per cent of the acute cases. The peculiarity about this disease is that the animals responsible for...
